Pumpkin Carving Stencils

14 free printable designs · black areas = carve out

1. Print at 100% (Actual size). Each design is about 6 in / 15 cm across, right for a medium pumpkin. Use your printer's scale to go bigger or smaller.
2. Scoop out the pumpkin and dry the outside. Trim the paper and tape it to the smoothest side.
3. Poke small holes along every black edge with a pin or poking tool, about 1/8 in (3 mm) apart.
4. Remove the paper and connect the dots with a small carving saw. Cut the small pieces first.
5. Grown-ups do the cutting; kids can trace, poke the dots and scoop. Use a battery tea light inside.

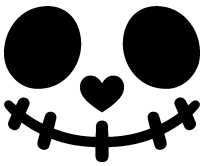

1. Classic Jack · easy

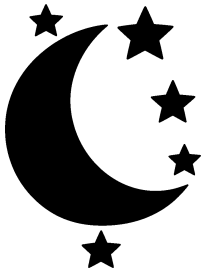

2. Winky Grin · easy
